

parenting

on life: parents take almost everything of children on themselves

on economy : parents indulge children

on social contact : parents protect too much

on study: parents are too strict

Chinese parents want their children to stand at the top of the society. So they only want children to study well.

- 1、 The children rely on parents too much.
- 2、 The morality and quality of teenagers are not very excellent.
- 3、 The ability such as creativity of children and independence are in low level.
- 4、 The children are not good at adapting a new circumstance.

- 1、 Chinese parents take the old experience to educate children.
- 2、 The culture that the parents and the children accept is different.
- 3、 The traditional thoughts do harm to family education.
- 4、 The parents look upon on substance while look down on spirit, which would make trouble on teenager's mental health.

Other matters

family misfortune , family economic condition, leftover children

- 1、 Respect children and treat them equally
- 2、 Have more communication, understand each other
- 3、 Parents should take education purposefully
- 4、 The whole society should transform the education system

Parenting is a science but also an art.

THANK'S
