

Report: Human and Animals

----**Reverence** is a must

Group members:

曾静 陶杉杉 沈清清 周芮

These are some extinct animals

- In the 20th century, there were **110** species and subspecies of mammals and **139** species and subspecies of birds disappearing on the earth.
- Everyday, there are **75** species disappearing, and **3** species are labeled as dead every hour.
- In the world, the kind of endangered wildlife has reached more than **794**, and **76** species of plants on the verge of extinction.
- In China, about **200** species had disappeared, and about **156** species are endangered, and about **3000-4000 plants** are in danger.

So, how do you feel?!

There are many reasons that cause the extinction of species

HUMAN is the most important reason.

1. **Illicit Trade**
2. **Habitat Losses**
3. **Over Exploitation**
4. **Blind Introduction of Varieties**
5. **Environmental Pollution**

There are even more
deep reasons...

Poverty

Law

People's thoughts

Government policy

Lacking global cooperation

THINK MORE AND DEEPLY

We are one!

All animals play an important part in the food chain as well as assisting other animals and plants.

Animals are also creatures on earth that together with humans make this planet a fascinating place to live in.

They deserve our respect!

However, there have been a lot of animals disappeared. Once they are gone, they'll never come back.

Can you imagine a world without animals?

Can you bear if the only way for your children to know an animal is through pictures or books?

Robbing their food and habitat is destroying our own living space! Protecting them is protecting ourselves!

What attitude should we hold?

Be reverend

What is reverence?

A close-up photograph of a dragonfly perched on a thin, brown twig. The dragonfly has a yellow and black striped abdomen and transparent wings with a delicate, veined structure. The background is a soft-focus green field of grass, with numerous bright, golden light rays or sunbeams radiating across the scene, creating a sense of natural beauty and awe.

Respect for life

Realization of how small we
are

Awareness of we can't control
nature, we are only a part of it

If we have reverence...

1. We will realize the importance of saving every water, because water is precious.
2. We will not waste our food, because food is valuable.
3. We will protect our forests, our rivers, our lakes, because they are irreplaceable.
4. We will not abuse, hunt animals.
5. ...

In fact, reverence also applies to other fields.

Food industry

Drunk drivers

...

OPEN UP YOUR MINDS!

Any other ways to help people live friendly with animals?

Practice inspection

Questionnaire

Do some volunteer jobs related to species protection

Be a member of WWF, for example

...

Be an educator and a practitioner!

We only have one earth.
Protecting the earth is protecting
ourselves.

Do always keep **reverence** in mind.

Thank you!
