

# Education reforms

## ◆ What is education

Education is the movement from darkness to light

## ◆ The purpose of education

## ◆ Problems of Chinese education

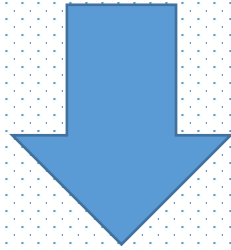

## ◆ Reforms

小组成员：胡婉仪、李霖、王婷、程瑜赞

# What is education?

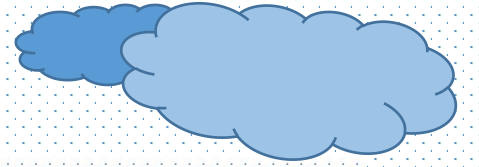

- e means out    elect    eject (投出)
- duc means guide    adduce (引证)    conduce (导致)

- The essence of education : a tree shakes a tree, a cloud drives a cloud and a soul wakes another soul up.
- Teacher is a beam of light guiding us to explore knowledge independently. They help us get out of confusion and walk towards the truth.

# The purposes of education

- **Human beings**: people is the fundamental aim of education. Students are human beings and the purpose of education is to inspire and guide their own development.
- **Life**: the only theme of education. The useless knowledge is harmful. As for the application of knowledge is to mix knowledge with our complex mental activities, that is called our life.
- **Growth**: to adapt to the students' intelligence development pace. Education should be standing on a rhythm, in the different stages of students' mental development, adopt different classes and different ways of learning.

# Problems of Chinese education

# Problems of Chinese education

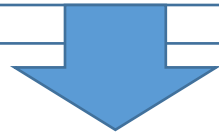

- Traditional spoon-feeding method of teaching
- Test-oriented education

- Teachers, parents and schools Care less about practice and interest cultivation
- Too much homework, students don't have enough time to have a good rest

- Students don't have a good attitude towards learning

- The rampant cheating in examination
- Depend on teachers too much.....

A woman in a plaid shirt sits behind a metal fruit cart filled with various produce, including watermelon, lemons, and green apples. To her right, a young girl in a white shirt and dark shorts sits on a wooden bench. The background is a light blue building with a white door and windows. The scene is outdoors with some greenery in the foreground.

This is a story about me, my daughter

# Reforms

1. parents/teachers: **encourage students to learn independently**

attach importance to practising

2. Students: **be good at thinking and have a very stringent attitude toward learning.**

take part in more school activities

read more books

set up a good character

apply knowledge to life

3. School: **encourage students to practice and autonomous learning.**

stress the importance of honesty

provide students with a good learning atmosphere

offer in-service teacher training programs

4. Country: **establish a mature and perfect the system of** modern education.

learn other countries' correct education system

Thanks for watching
