Suggestions to individuals

research

Method of Investigation

1、 field method

2、 interview method

Interviewee

①farmer

②A man

③A college student studying in other places

④Cleaner

⑤Village head

What did they say?

Farmer: There's a lot of rubbish in the field, especially plastic. **Plastic decomposes slowly and prevent crops absorbing water.** I hate garbage and I would pick up trash in the field regularly.

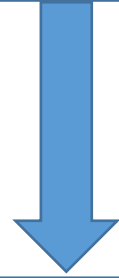

The man: I think the pollution problem in our village is the most serious. We have trash cans **but we just carry rubbish to another place near our town.** You know, we make garbage every day, it's useless just to take out the trash.

Field visits

The college student: My family used to dump rubbish into the wasteland near my house. **The garbage piled up day by day and even stinked.** Luckily, trash cans were delivered soon and we never dump the garbage into that wasteland anymore.

1. aware of the damage of pollution
2. to form new habits
3. the way to deal with rubbish

- ? How exactly does the cleaner handle the rubbish?
- ? Why does he do this?

What did the cleaner say?

Three methods to handle the garbage

① burning

② dumping on the land

③ dumping into the lake

Why does he do this?

- 1、 no place for rubbish
- 2、 no garbage disposal

It's his responsibility to keep the village clean, why does he do better?

- 1、 villagers
Lacking garbage classification consciousness: They dump everything into the trash can even construction waste. And many villagers still have the habit of littering everywhere.
- 2、 government
Low salary: This job is tiring but I only earn little.

Pollution problems we face

1

Lacking garbage classification
consciousness

2

No place for garbage; no garbage
disposal

3

Lacking attention from the government

Analysis

The core problem in this village is that there is no place for disposing trash intensively, but all the problems in this village are only small parts of a big “iceberg”. There are more complex and severe problems in other villages and cities around the country.

1. government

① Pollution caused by factories:
Government has the power to deal with it, but sometimes necessary measures aren't taken to deal with the pollution, maybe due to a lack of money or the corruption among officials.

② Pollution caused by individuals:
Government doesn't have the ability to call on everyone to stop littering, and because government doesn't administrate the village directly, it's hard to take some effective measures.

2. village head

As the direct administrator, some village heads don't take the responsibility to keep an eye on the environmental problems. They may concentrate more on the prosperity of the village than the environmental issues.

Some may even sacrifice the environment deliberately in pursuit of economic development.

3. individuals

① ignorance

Many villagers are farmers and they didn't get much education, which leads to their ignorance of the importance of protecting the environment. So they just keep polluting the environment without becoming aware of the crisis.

② habit

Some villagers do realize the harm littering can cause to the environment, but they may have already formed the bad habit and it's hard to change it in a short period of time.

Advice to government

Advice to government

- To improve the quality of citizens and develop the public awareness of eco-civilization through launching publicity campaigns.

生活垃圾前端分类宣传栏

生活垃圾前端分类收集和处置流程总图

环保小技巧

- 1、购买少包装或无包装产品，尽量使用大包装，选择浓缩产品。
- 2、使用可重复使用的产品，尽量维护可维修的产品。
- 3、重复使用容器、袋子等、出售或捐出不再使用的物品。
- 4、选择使用可回收的产品及容器并加以回收利用,选择以再生材料制成的产品。
- 5、参与各项回收活动。

垃圾要分类 资源要利用

能变废为宝 有害单独放

请记住 垃圾要分类哦!

垃圾分类 从你我做起

致市民的一封信

深圳是一座改革开放前沿城市，随着经济社会发展，生活垃圾产生量快速增长，垃圾填埋场饱和，垃圾焚烧处理能力不足，垃圾围城现象日益严重，严重影响城市形象和居民生活质量。为改善城市环境，提高资源利用率，实现绿色发展，市政府决定在全市范围内开展垃圾分类工作。垃圾分类是城市文明的重要标志，也是建设生态文明的必然要求。我们呼吁广大市民积极参与垃圾分类，共同为建设美丽深圳、幸福深圳贡献力量。

垃圾分类与标识

垃圾分类是指将垃圾按照不同的成分、性质、用途等进行分类，以便进行不同的处理和利用。垃圾分类的标识如下：

- 可回收物：蓝色标识
- 厨余垃圾：绿色标识
- 有害垃圾：红色标识
- 其他垃圾：灰色标识

生活垃圾分类的好处

生活垃圾分类的好处有很多，主要包括：

- 减少垃圾填埋量，减轻对环境的压力。
- 提高资源利用率，实现资源的循环利用。
- 减少有害垃圾对环境的污染，保障人体健康。
- 改善城市环境，提高城市文明程度。

垃圾分类，从我做起。让我们行动起来，共同为建设美丽深圳、幸福深圳贡献力量。

Advice to government

- To carry out collecting and disposing garbages in sort and to develop the system for waste recycling.

Many foreign countries do well in this respect. For example, people in France are forced to separate waste collection. Every household has different colors of garbage cans which have different garbage collection functions. And there's an idea called “change waste material into things of value” in Britain. British people often clean recyclables and then recycle them, such as empty glass bottles.

Advice to government

- to charge fees of waste disposal .

As we all know, the United States is the world's first-biggest rubbish manufacturer. But how do Americans deal with this?

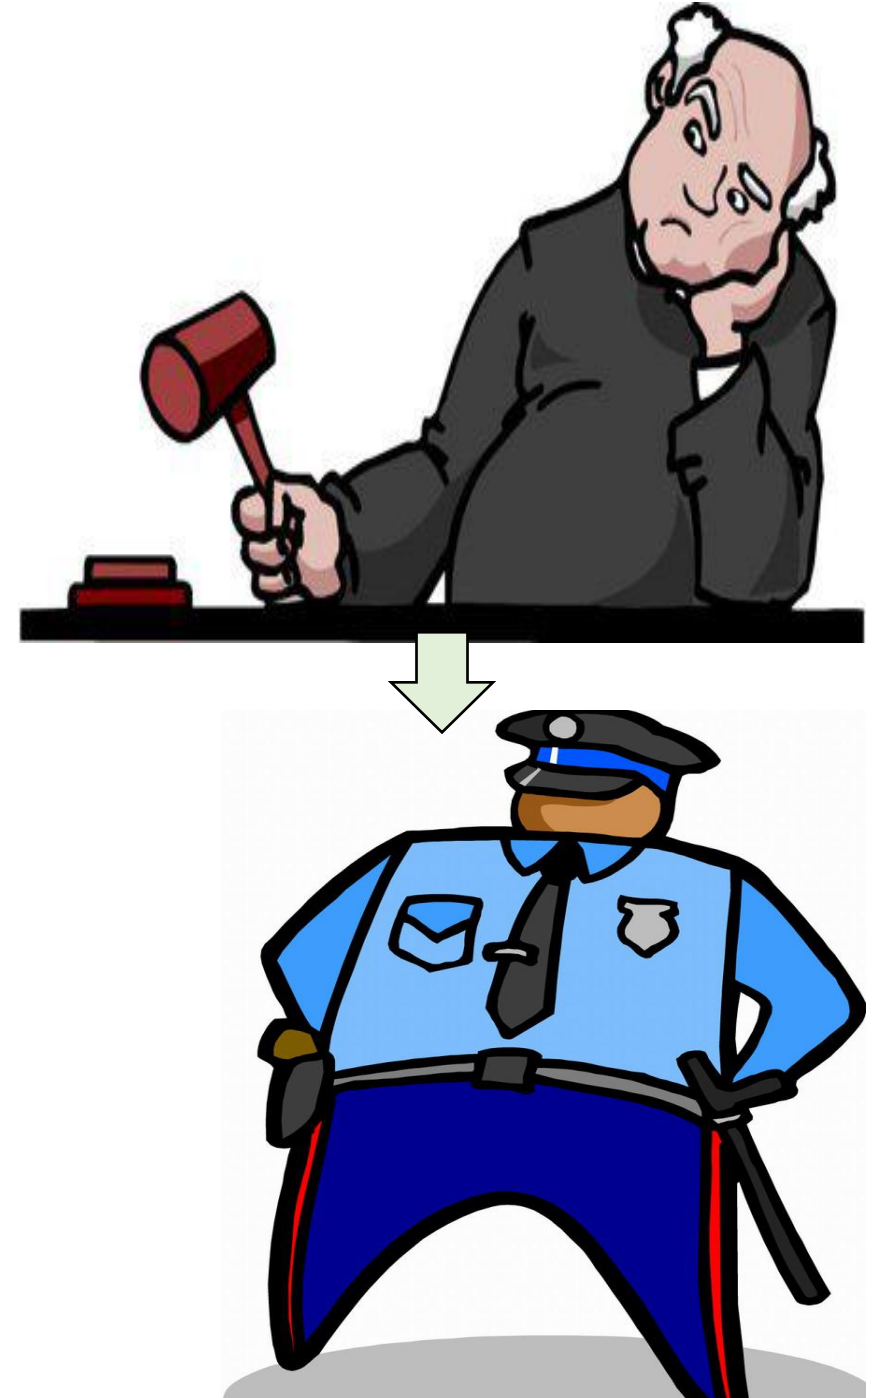

PAYT (pay as you throw)

In the USA, there is no free dumping of garbage, every family has to pay for garbage collection and disposal. Residents must buy garbage bags in the shop, while the cost is not so high, it will make people think about how to reduce waste and costs. In this way, PAYT would reduce litter and increase rates of recycling.

Advice to government

- To establish relevant legislation and enforce it.

Government can pass and enforce laws that require businesses and individuals to do the sorted collection of waste. And punish the illegal actions.

Suggestions to individuals

Gause of garbage

- packed foods & plastic bag
→ more plastic
- more cloths(or other things)
→ more nylon
- more disposable chopsticks
→ more waste
-

At home

- Reuse plastic bottle, gift-wrap, and gift bags and boxes.
- Sell useable clothing, furniture, toys, sporting goods, CDs, jewellery and other items you no longer want instead of throw them in trash can together.

Outdoors

- Throw rubbish into garbage can

At school

- Reduce buying packed food
- Reduce paper use by using both sides
- Purchasing refillable pens instead of disposable pens
- Educate others about the garbage issue

In the store

- Buy in bulk to reduce the amount of packaging.
- Use cloth bags when shopping .
- Use environment -friendly products.
- Think about whether you need or not.

Reduce

Reuse

Recycle

Everyone can be part
of the solution.

Purchase durable products

Take responsibility for the waste you produce. Make a difference at home, outdoors, at school and when shopping. It's easy and every little bit helps!

Now, our human's awareness of environmental protecting has been promoted. But actually, many people still do not take measures into practice. So if you never want to live in such a dirty environment, if you want to change the present situation, just put the theories into practice and begin with yourself!

THANK
YOU!
