Interview

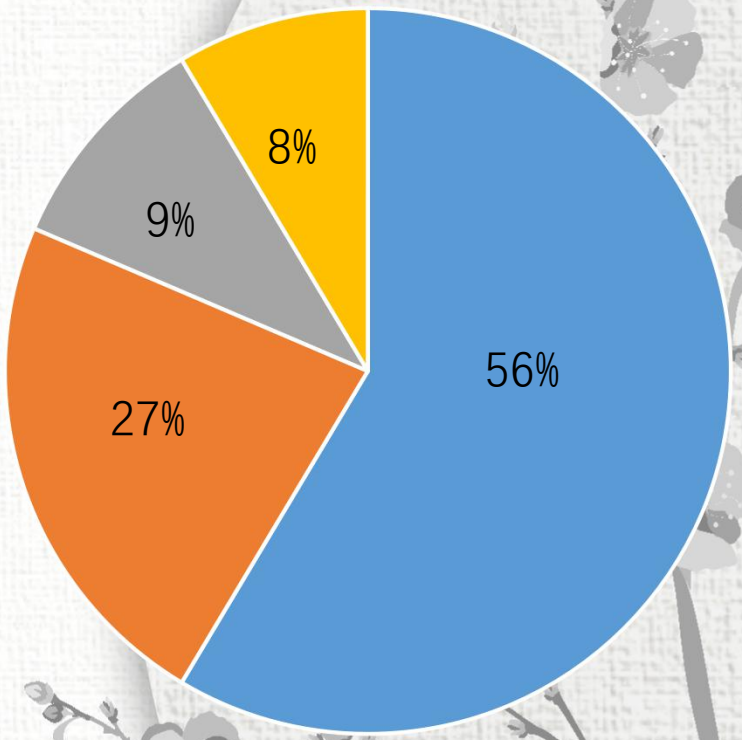
—From people in Ningbo

People's Attitude to the Suichang's Air Pollution



Well, I know the lishui city environment is very beautiful. So Suichang should also be not bad.

——From a conversus

It is Lishui that has the title of the first ecological city in China.

——People's Daily 'the trend of our time'

I think no matter how good the air is, each city has air pollution. The key lies in the government management.

——From a student

Problems are not stop signs, they are guidelines.

Advantages and keeping

Shortages and improvement

Analysis

In General

- It is very good compared with others.

but

- It can be improved as well.

Specifically

From January to December, the county air automatic monitoring station obtain valid data 342 days, of which air quality is good days 323 days, mild pollution days is 19 days, no moderate pollution and the above situation, Air quality and good rate of 94.4%, compared with the same period last year, excellent rate increased 6.44%.

The overall air quality and good rate was a good trend.

In Conclution

Suichang's air condition can represent the higher level of Zhejiang Province. However, there are still some improvements can be made.

- The government can develop relevant policies and increase investment in environmental issues.
- Enterprises can pay attention to emissions problems.
- Suichang people cherish Suichang's good air, improve environmental awareness, promote environmental thinking.

Ensure the beautiful future

Action

1：Punishment
2:　Plant a lot of trees and grass.
3:　Reduce pollutant emissions
4:　Control emissions and make full use of atmospheric self-purification capabilities.

If we do every we can ,the air pollutionwill be solved soon.

Our opinions

The fight over the appropriation of resources will lead the entire planet to hell unless humans learn to share life, both with each other and with plants.

This task is simultaneously ethical and political because it can be discharged only when each takes it upon herself or himself and only when it is accomplished together with each

All in all, the air belongs to us all and everybody on the planet should take the responsibility to protect the environment, to be specific, the air.
