饼状 圆环 柱状 条形

Most of the people would drink the water in the well in certain circumstances, only few people insist on not drinking well water. However, the living pollution in Dongyang is so serious, people should raise awareness of environmental protection.

# When you see someone dump rubbish or pour waste water into the polluted water, what would you do ?

Most people think this kind of behavior is wrong, but only half of these people would stand out to stop such behavior. People are aware of the importance of protecting water resources, but some of them fail to fulfill the responsibility to protect water resources.

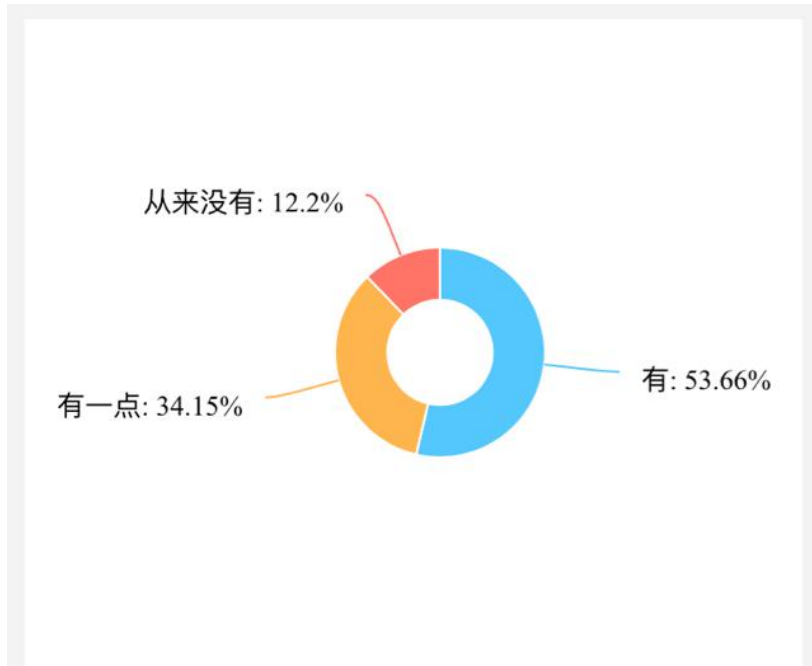

# Do you think the media is the main way for the public to know about water quality?

Most people think the media is the main way for the public to know about water quality, or at least a important way

Media includes internet, newspaper, broadcast etc. So it's definitely an important way for the public to know about water quality. The public need to pay more attention to the information about water quality.

# Do you think legal measures are the best way to control water pollution?

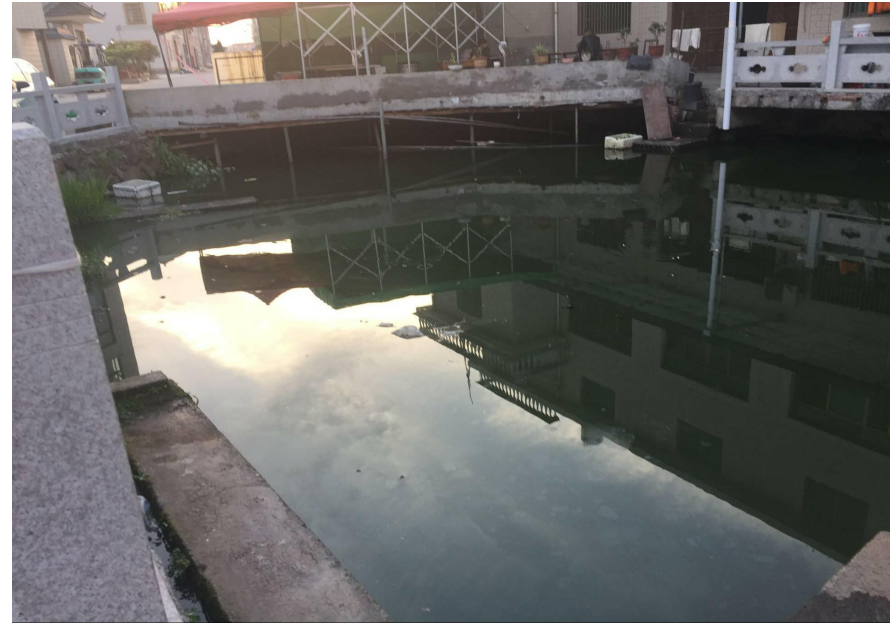

The majority of people think legal measures are the best way to control water pollution. But there are also different opinions. Legal measures are mandatory, so it can be the most effective way. But we should find other ways to solve the problem from the root

# Water Pollution In Dongyang

- Water pollution is serious in Dongyang, especially in the countryside, in the river, you can see litter floating on the water, and sometimes the river would stink in hot days. In fact, it isn't as clean as the old days, my mother once said when she was a child, she always had fun in the rivers with her brothers and sisters, she even could drink the water directly. It's a shame that nowadays the water pollution has been so serious. Although the government has taken some measures to protect the river, it would take a long time to have clear river again. To have a clearer cognition, take a look at some pictures.

# Water Pollution In Dongyang

- And, because of water pollution, more and more dead fish appear on the river, their dead bodies added to the pollution. We had to say, it's a viscous circulation.

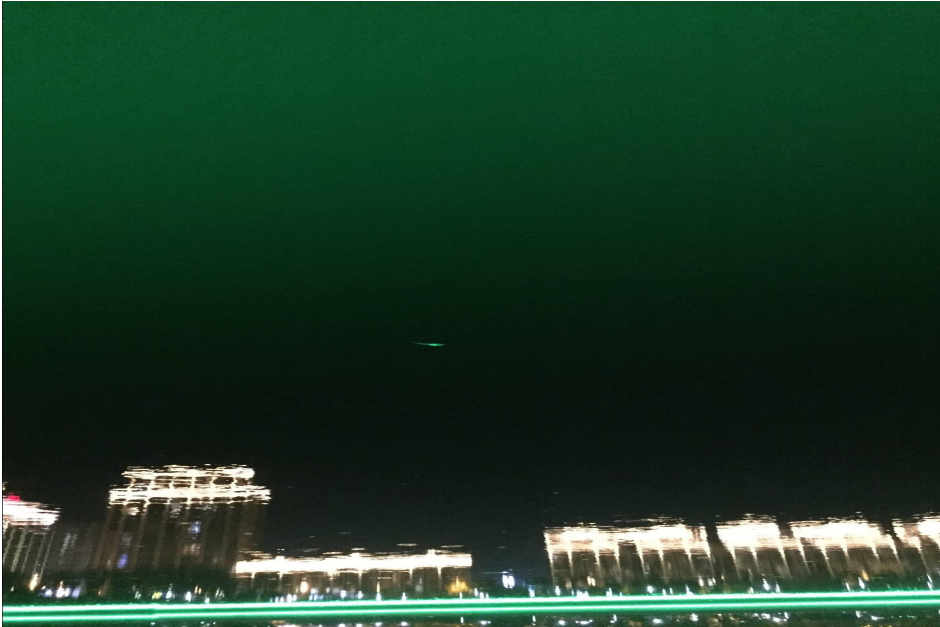

1. Water pollution has a great effect on human health
2. Water Pollution affects the quality of industrial products and causing serious economic losses. Water pollution also increases the cost of processing water for industry.
3. The impact on agriculture, fishery production and the quality of agricultural products have decreased

# how to deal with water pollution?

# methods

1. First, we can use the reform process to reduce or even discharge waste water or reduce the toxicity of toxic waste water.
2. Recycle waste water after proper treatment.
3. Control the concentration of pollutants in wastewater and recycle useful products.
3. Dispose of municipal waste and industrial waste residue to avoid contaminating water bodies due to precipitation or runoff.
4. Comprehensive planning, rational distribution and regional comprehensive governance.
5. Strengthen monitoring and management and formulate laws and control standards.
