car bus bike foot

Field interview

Q: What do you think that mainly cause the air pollution in Wenzhou?

A:

Teenagers: They think that the pollution which we produce in daily life is the mainly reason.

The middle age: They believe that factories are to blame.

The old: They think the mainly reason is car exhaust.

Q: What can we do to reduce the pollution?

A: All people we interviewed agree that using low-carbon transportation is a good way. And some think that using recyclable bags can also help.

Data analyzing

Part Two

Analyzing

Analyzing

Reasons

factory

Many factories discharge pollutants without permission.

government

Local governments take actions to deal with air problem not very often, and some even never take any actions.

transportation

Car exhaust mainly causes air pollution.

Measures

Part Three

Measures

Central government

- Make laws
- Invest money in developing new technology and device

Citizen

- Use recyclable bags
- Ride bicycle and take bus more often
- Plant trees

Local government

- Supervise factories frequently and strictly
- Propagandize environment protection
- Organize air protection activities

Factory

- Purify pollutant before discharging it into air
- Use advanced technology
- Use clean energy instead of coal

Future development

Part Four

Future development

Future development

The sky is blue, and there is no fog any more.

There are many trees in our city.

The air is clean, and people don't need to wear masks.

The public transportation is advanced, developed and people hardly drive their cars.

The exhaust of factory is clean and no harm to air.

Non-renewable resources are replaced by renewable resources.

A scenic landscape at sunrise or sunset, featuring a winding river, rolling hills, and a small village. The scene is bathed in warm, golden light, with mist or smoke rising from the valley. The text "Thank You" is overlaid in a large, white, sans-serif font, centered within a bright yellow rectangular frame.
